

Business Fundamentals

A modular programme for GPs

Beds & Herts LMC Ltd have designed a modular programme of business fundamentals aimed at GPs who want to understand general practice at operational and strategic level. The course provides practical tools underpinned by theory to help tackle the ever-increasing challenges to build a strong, sustainable future in primary care.

This pilot programme has been funded with thanks to BLMK STP for GPs working in the BLMK area who demonstrate an interest in business, partnerships, strategic planning and leadership development. Each module is delivered and facilitated by experienced primary care specialists 1 day* a month from February to July 2019. Further funding is being sought to deliver this more widely across our 2 STPs.

Module 1

Partnerships –
Logistics, Legalities &
Governance

Module 2

Managing People

Module 3

Managing the Business
& Managing Change

Module 4
